Shure M44-7

Revived exactly the same as the original, this legendary battle needle offers ultra-high skip resistance and ultra-high output. The needle of choice for many champion DJ's worldwide. Engineered for scratch DJ's and turntablists, the M44-7 is designed not to skip under even the most demanding circumstances.

- Combining the Shure unique wide-diameter Type S cantilever with a tracking force of 1.5 to 3.0 grams, the M44-7's rugged construction is highly durable, but will not unduly wear your vinyl.
- With a 9.5 mV output, the M44-7 produces powerful, resonant sound.

- **Skip Resistance**: ultra high
- **Output**: ultra high

- **Record Wear**: ultra low
- **Sound Emphasis**: big bass

Tone Arm Mount
Standard 1/2 inch

Cartridge Type
Moving Magnet

Output Voltage
Typical at 1 kHz
9.5 mV RMS at 5 cm/sec peak velocity

Recommended Load
47 kilohms in parallel with 450pf

Tracking Force
Effective at stylus tip
Range: 1.5 to 3 grams

Stylus Cantilever
Shure Type S
Heat-treated aluminum alloy / tubular
1.6 mil wall thickness / 34.5 mil diameter

Diamond Stylus Tip
Polished natural gemstone: Spherical
Radius: 0.7 mil

Frequency Response
Essentially flat from 20 to 20,000 Hz

Stereo Channel Balance
Within 2 dB

Channel Separation
Typical at 1 kHz: 20 dB

Net Weight
6.7 grams

Height
15.9 mm
